

QUICKSET™ INK-KEY LEVERS™

All Goss Community* Units: New or Old

All models of Goss Urbanite and Suburban*

All models of Harris* Presses—new or old—even to replace old Telecolor* systems

All Quad-Stacks, Quadra-Color, and Web Leader units*

All models of Hanscho*

250,000+ QuickSet levers installed Worldwide

We routinely adapt our patented lever design to new models of presses. We also currently have designs for Solna, Global, Dev, Hamilton, and Color King/News King presses.

Our durable stainless steel levers will last the life of your press.

The most popular lever retrofit ever in the newspaper and web offset industries

Lever retrofits have the most proven ROI of any press upgrade. The ROI for QuickSet levers is almost universally under 6 months. After the twin towers disaster, we drastically lowered our prices—and we have maintained that same low pricing for over 10 years now, so there has never been a greater value for your dollar in acquiring QuickSet levers.

Let's not overlook your upgrade path to QuickSet Ink Pre-Setting. Who would have thought that the combination of QuickSet levers with QuickSet Ink Pre-Setting would get color to a save position quicker than even the most expensive closed-loop driven remote consoles? Well, that is exactly what happened. You can get QuickSet levers now, and later add QuickSet Ink Pre-Setting, providing the only measurement-based and measurement-calibrated ink pre-sets in the world.

Do-it-yourself Install:

- No installation costs
- Installs in current ink-key holes
- No Drilling
- No Tapping
- Your Pressman can install
- Easy to calibrate zero setting
